Constructor

↳ constructor ek special class member hai jo object creation ke waqt initialization ke liye use hota hai

publ

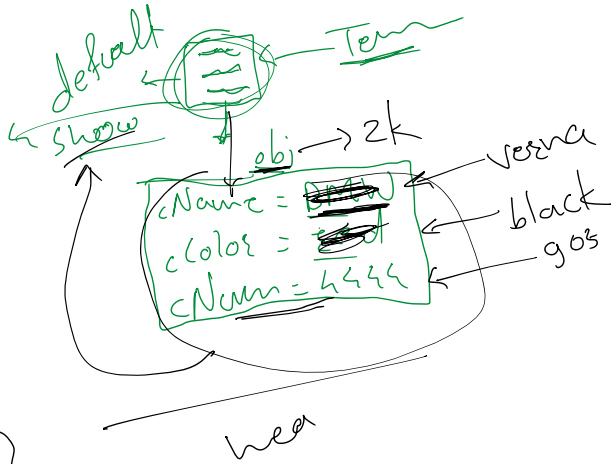

```
class  Car {
    // Data Member
    String cName;
    String cColor;
    int cNum;
    // Constructor
    Car(){
        cName = "BMW";
        cColor ="red";
        cNum = 4444;
        System.out.println("car name : "+ cName);
        System.out.println("car color : "+ cColor);
        System.out.println("car Number : "+ cNum);
        System.out.println();
        System.out.println("=====================");
        System.out.println();
        show();
    }
    void show(){

        System.out.println("car name : "+ cName);
        System.out.println("car color : "+ cColor);
        System.out.println("car Number : "+ cNum);
    }

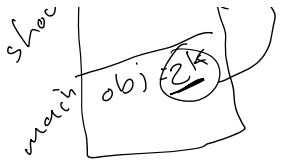

}
```

Car obj = new Car();

→ this = 2k

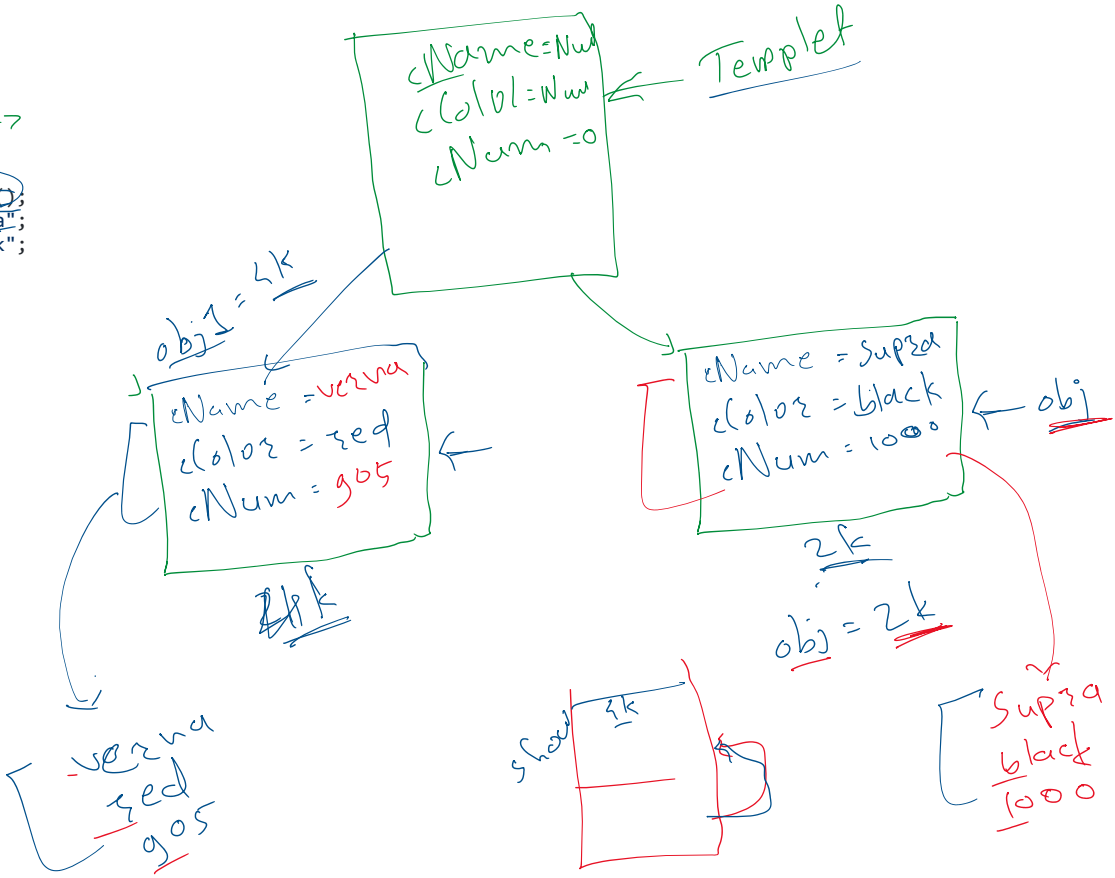

```
Car obj = new Car();

        obj.show();
        Car obj1 = new Car();
        obj1.cName = "verna";
        obj.cColor = "black";
        obj1.cNum = 905;
        obj.show();
        obj1.show();
    }
```

car name : Supra
car color : black
car Number : 1000
car name : verna
car color : red
car Number : 905
