String → java

array

non-primitive → heap

① String str = "coding" → 2k

② string str2 = new String("coding")

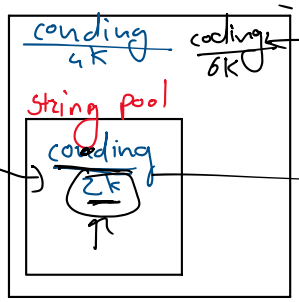

③ String str3 = "coding" → 2k

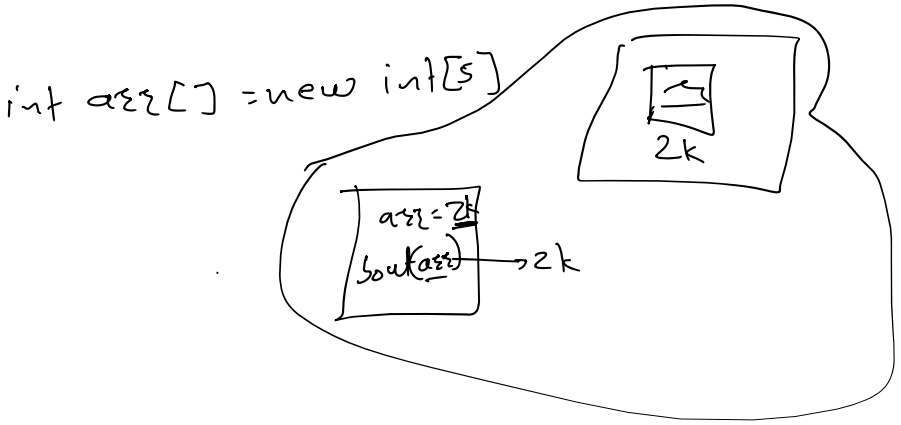

④ String str4 = new String("coding"); → 4k

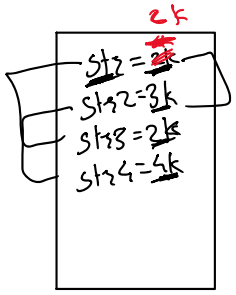

sout(str) →

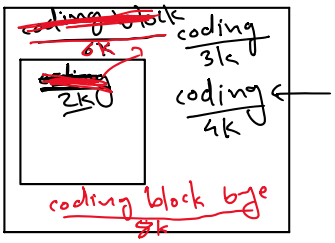

str == str2
str == str4

str2 == str4
str == str3

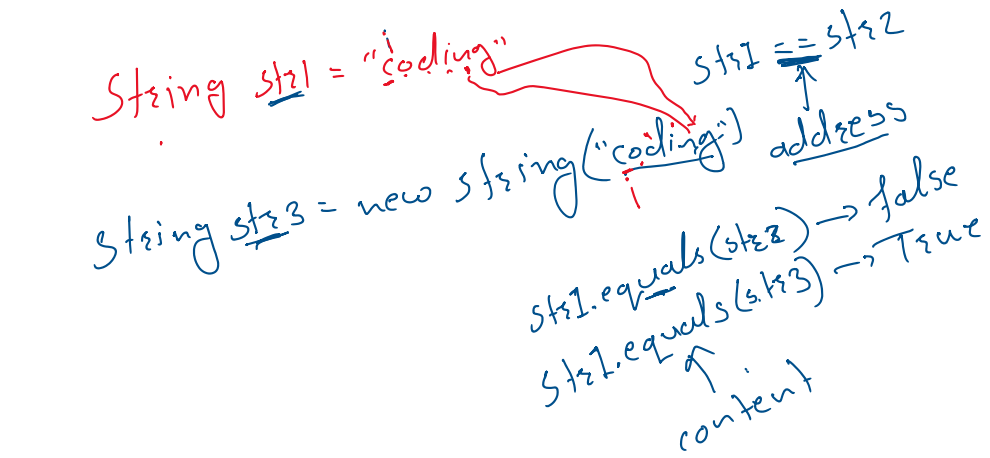

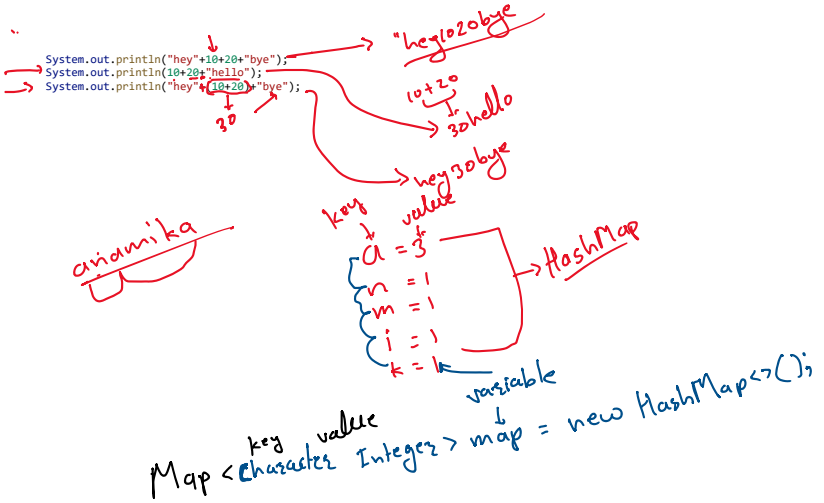

str == str2 → F
str == str4 → F
str == str2 → T

str = str.concat("blocks")
6k

str = str.concat("bye") → coding blocks bye

Map <Character, Integer> map = new HashMap<>();
